Note: In order to receive SRF funding for efforts prior to the auction, this federal entity has agreed that it will provide (I) to the fullest extent possible, for sharing and coordination of eligible frequencies with non-Federal users, including reasonable accommodation by the eligible Federal entity for the use of eligible frequencies by non-Federal users during the period that the entity is relocating its spectrum uses (in this clause referred to as the "transition period"); and (II) for non-Federal users to be able to use eligible frequencies during the transition period in geographic areas where the eligible Federal entity does not use such frequencies. Additionally, this eligible Federal entity will, during the transition period, make itself available for negotiation and discussion with non-Federal users not later than 30 days after a written request therefor; and during the transition period, make available to a non-Federal user with appropriate security clearances any classified information (as defined in section 798(b) of title 18) regarding the relocation process, on a need-to-know basis, to assist the non-Federal user in the relocation process with such eligible Federal entity or other eligible Federal entities. [47 U.S.C. § 928(d)(3)(B)(ii)]

DOD\N 1755-1780 (Rev. 7) (Sufficient) - Interactions

Interaction Name	Interaction Description
1	<p>Spectrum Certification: This Transition Plan is based on the DoD Alternative Proposal for the 1755-1780 MHz band; details can be found in Plan Notes (Additional Information). As part of the Transition Plan, some systems will be modified to operate in both the 1780-1850 MHz and the 2025-2110 MHz bands, while other systems will be retuned or modified to operate in other federal bands. All modified equipment will be required to undergo the spectrum certification process through the NTIA Spectrum Planning Subcommittee (SPS) IAW OMB Circular A-11, Section 31.12(c). This certification is required before agencies can "submit estimates for the development or procurement of major radio spectrum-dependent communications-electronics systems". The spectrum certification process through the NTIA Spectrum Planning Subcommittee can require a number of months to complete for routine equipment developments. It is anticipated that due to the numerous simultaneous certification requests required to enable the modification and/or replacement of the systems identified in this and other agencies' Transition Plans, there will be a significant backlog within the SPS process. It should also be noted that the spectrum certification process is required at each stage of a program's development and thus some of the modified or relocated systems may be required to undergo the SPS review process multiple times. These interactions will begin soon after this Transition Plan is approved and will continue until all affected systems receive spectrum certification approval from the SPS.</p>
2	<p>Frequency Authorization: All systems that require either different frequency assignments in the 1780-1850 MHz band, modification to operate in both the 1780-1850 MHz and 2025-2110 MHz frequency bands, or relocation to operate in other federal bands will have to follow the frequency authorization process in order to obtain new frequency authorizations. It is understood that the formal frequency authorization process through the NTIA Frequency Assignment Subcommittee (FAS) must be completed at a future time, subsequent to the associated SPS certification process for the systems/equipment and prior to actual operations in the alternate bands and verification/validation of comparable technical capability. These interactions will begin soon after this Transition Plan is approved and will continue until all affected systems become operational in dual or alternate frequency bands as defined by the Transition Plan.</p>
3	<p>Federal Communications Commission (FCC) band allocation rules development and adoption. The allocation for and use of this band by non-federal fixed and mobile users will require the development of specific technical rules governing non-federal operations, such that sharing of the band between federal and non-federal users is feasible and jointly successful. The development of these rules will be critical to the successful implementation of the DoD Alternative Proposal and the associated transition of systems addressed in this plan from the band. These rules must be adopted prior to the auction of the 1755-1780 MHz band such that potential licensees are fully aware of the requirements that they must comply with to begin operations in the band.</p>

Releasable

DOD\N 1755-1780 (Rev. 7) (Sufficient) - Interactions

Interaction Name	Interaction Description
4	Development of Coordination Guidelines For Federal Agencies and Industry: Given the fact that most federal operations will still be in the band upon the award of licenses by the FCC and some federal operations will continue indefinitely in the band, specific coordination guidelines must be developed and published by NTIA (for federal agencies) and the FCC (for non-federal licensees). The formal development of these coordination procedures has not yet begun by NTIA and the FCC, but they will be essential to the any early entry by licensees as well as for the long term sharing coordination that will be required.
5	New 1494s will be processed under the normal timeline and through the normal process.
6	*****
7	NTIA and the FCC to adopt specific Regulatory Criteria required to protect the out of Band Emissions (OOBE) by the Wireless Industry UEs and base stations to the AMT receiver sites. This OOBE protection is requested through the AWS-3 NPRM with the FCC and will include the defined requirements for DoD's AMT Standards for protection via ITU-R-M.1459.
8	DOJ systems will be required to migrate to digital modulations to reduce system bandwidth to allow AMT efficient modulation systems to share the band where applicable. All use by DOJ in this band must be accurately documented in the GMF so the DoD may de-conflict through engineering analysis.
9	*****

Releasable

DOD\N 1755-1780 (Rev. 7) (Sufficient) - Impact Factors

Factor Name	Factor Description
AMT 1: Limited manufacturing capacity of vendors of telemetry equipment.	Complete transition may be delayed if manufacturers cannot fulfill equipment orders and provide installation services in a timely manner.
AMT 2: Federal Government procurement delays.	Delays to the transition may result from delays in establishing equipment and service contracts.
AMT 3: Insufficient temporary mobile telemetry ground stations.	Insufficient temporary mobile telemetry ground stations to sustain range telemetry capacity during the transition. If temporary mobile telemetry ground stations were not available as required by the Transition Plan, delays to the modification of telemetry ground stations would result and would cause delays to the overall transition out of the band.
AMT 4: Weather Conditions	This transition plan is dependent on installation of new equipment on exterior (outside) aeronautical mobile telemetry sites at the USN NAWC AD Patuxent River MD installation which could be delayed due to extensive winter (cold) and summer (extreme heat index) weather conditions.
AMT 5: Access to Comparable Spectrum (Regulatory)	*****

Releasable

DOD\N 1755-1780 (Rev. 7) (Sufficient) - Impact Factors

Factor Name	Factor Description
AMT 6: Technical Solutions	Another primary factor that will limit the implementation of this transition is obtaining the minimum necessary funding (identified in this transition plan) in order to implement the identified mandatory technical solutions in this plan. These technical solutions will increase the spectrum efficiency and multi-band flexibility of the AMT operations in order to meet customer demands at high-density locations like the Navy's premier Research, Development, Test and Evaluation (RDT&E) facilities of the Naval Air Warfare Centers (Aircraft Division - AD; and Weapons Division - WD). These technical solutions are necessary in order to meet these RDT&E requirements with reduced operating bandwidth above 1780 MHz coupled with the other DOD and Federal users now pursuing this same compressed 70 MHz of spectrum.
AMT 7: Spectrum Monitoring Equipment	Spectrum monitoring equipment is a key aspect of the Navy's ability to monitor, locate and enforce spectrum usage in a new severely congested and compressed part of the RF spectrum above 1780 MHz. Additionally, at locations like the NAWCs, spectrum sharing in the 2025 - 2110 MHz will be prevalent and must be monitored to ensure interference free operations for all spectrum users. We will be unable to implement and execute this transition plan without spectrum monitoring and location systems at our installations.
Availability of Frequency Assignment Authorizations	This Transition Plan is based heavily on the DoD Alternative Proposal and its success is critically dependent on the interaction of a number of interdependent elements including those activities of other federal agencies (e.g. DOJ Transition Plan). A number of these elements involve either replacing or modifying systems that will operate in alternate frequency bands. There will be a very large number of new frequency authorizations required in order to support the new operations. New authorizations must be in place prior to existing operations or authorizations being able to be terminated in the 1755-1780 MHz band. Given the large number of new frequency proposals that must be worked through the process and completed, there is concern that all necessary actions can be completed in time to support all of the new operations.
Availability of Spectrum Relocation Fund (SRF) Funding	All timelines in this plan are based on the assumption that funding will be received three months after the close of the auction. Should the receipt of funds change, timelines may need to be adjusted accordingly.

Releasable

DOD\N 1755-1780 (Rev. 7) (Sufficient) - Impact Factors

Factor Name	Factor Description
Availability of Spectrum Relocation Fund (SRF).	Availability of Spectrum Relocation Fund (SRF) Funding to provide a Coordination Portal Capability. The coordination process that wireless licensees will be required to follow includes the DoD requirement to perform associated analyses of potential interference from wireless licensee build-out plans. The DoD will, by necessity, be required to respond to numerous industry coordination requests on specific timelines. This coordination effort will be conducted through a DoD web-based portal capability, which will require time to develop and implement. Given that SRF funding to initiate the development of the DoD portal will not be available until months after the auction and award of licenses, a full coordination capability will not be in operation until early 2016, at the earliest. (Note: A lesson learned from the 1710-1755 MHz auction was that advanced funding to agencies prior to an auction could facilitate enhanced auction revenues and reduced relocation agency timelines. This lesson was the basis for certain language that was incorporated in the Middle Class Tax Relief and Job Creation Act of 2012 which resulted in changes to the Commercial Spectrum Enhancement Act. However, the actual language contained in the Tax Act is such that advanced SRF funding is restricted to a limited set of qualifying costs and are essentially impossible to obtain in a timeframe that actually benefits agencies' advanced preparations for an auction and transition.)
Classified or Sensitive Information that is not releasable to the public is included.	Classified or Sensitive Information that is not releasable to the public is included in the Transition Plan. In accordance with 47 USC 929 - National Security and Other Sensitive Information, the Service Secretary has determined that public release of the information marked as sensitive/FOUO, taken in the aggregate as presented in this TP would reveal sensitive national security information. Withholding the sensitive information has no impact on fulfillment of this transition plan as the protection areas already identified are inclusive.
Licensee Coordination With DoD organizations	To preclude any misunderstanding or misinterpretation, potential licensees must be advised that the DoD will provide direction to the military Services and other defense agencies to refer all requests for spectrum relocation information initiated by commercial wireless providers or their agents to the DoD CIO, Spectrum Policy and Program Directorate. The DoD CIO will establish a single focal point that will be responsible for establishing and overseeing procedures to facilitate information exchange between the DoD and wireless licensees.
PGM 1: Limited Government staff to work transition	Delays to the transition may result from limited Government staffing to monitor contract performance and provide technical oversight of transition implementation.

Releasable

DOD\N 1755-1780 (Rev. 7) (Sufficient) - Impact Factors

Factor Name	Factor Description
PGM 2: Limited Contractor staff to work transition	Delays to the transition may result from limited Contractor staffing to complete the non-recurring engineering update and the recurring hardware/software retrofit activities.
PGM 3: Timeline to transfer overseas hardware for retrofit	Delays in transfer of overseas hardware from deployed fleet activities may delay the completion of the hardware retrofit.
TRR: Ship availability schedules	Installation dependent upon availability of ships to install

Releasable

DOD\N 1755-1780 (Rev. 7) (Sufficient) - Notes

Note Name	Note Text
62	DoN TRR 1: OMB Approved Transition Plan Update (Cost increase) on 18 Nov 2019. Original Plan was \$126,800,000, cost increase of \$22,490,000, for a revised total of \$149,290,000.
63	DON ACTS: DON CIO memo of 27 March 2020, provides official notification to extend funds execution for the AWS-3 Transition Plan in support of the Air Combat Training System (DON-28 ACTS) through the end of December 2023 to ensure program completion and regain full operational capability. Based on request from DOD, Navy accelerated release of frequency assignments by 4 months, and compressed into the 1780-1850 MHz band. The acceleration caused program delays, the efforts, which now be completed by December 2023, include verification and validation of the software application Watchdog. This includes making software modifications necessary to identify the signal strength or degradation of Tactical Combat Training Systems (TCTS) operating frequencies.
64	DON Video 1: DON CIO approved update to end of expenditures from 36 to 55 months on 9 April 2018. DON CIO memo of 24 March 2020, provides official notification to extend funds execution for the AWS-3 Transition Plan in support of the Missile Defense Agency (DON-21: MDA/DON Telemetry 5) through the end of December 2020, to ensure program completion and regain of full operational capability. The efforts which will be completed by the end of calendar year 2020 include test and evaluation; procurement of radio modules, antennas and other subsystems; and integration to support the MDA programs.
01	For frequency entries that indicate “Vacate With Temp”, the following stipulation applies. The concept of “temporary sharing” is subject to several conditions. These include: the requirement for the 1755-1780 MHz Early Entry Portal to be operational to handle coordination requests; coordination requests will be addressed on a site-by-site basis and sharing conditions shall be approved by the Military test and/or training range affected; sharing consideration will be assessed based on industry build-out/deployment plans and incumbent DoD operations; and a recognition that industry be aware that sharing may be assessed as not feasible for an extended period of time. Industry should not assume that a label of “Vacate With Temp” indicates that sharing for that frequency is in any way assured. The label only means that DoD is agreeable to determine if sharing is feasible in response to individual industry coordination requests.”

40	*****
41	*****
42	DoN HQ Transition Process Management: Approved Transition Plan (14Jul2014): Establish coordination processes and contract vehicles in preparation for post-auction coordination activities, process spectrum certification requests, manage allocation of transition assignments, monitor use of new compressed spectrum, monitor and report encroachment, monitor and resolve interference, lead and coordinate spectrum sharing studies, develop support/service contract, allocate, oversee and monitor expenditures and coordinate SRF reports.
43	DoN Other 1-5: TTNT operates on a variety of platforms. Therefore, Navy used a designation of DoN Other 1-5 for each TTNT assignment on the transition plan to divide the funds by platform. DoN Other 1-5 was used on the Navy Transition Plan for programmatic reasons and may be used at multiple locations in accordance with their assignments to cover specific systems not initially listed on the "Funds" Tab on the ST2 Tool.
44	DoN Other Systems Transition Support; Approved Transition Plan (14Jul2014): Includes direct participation by Program office in sharing studies, development and administering of training relative to spectrum transition impacts on capability, configuration management of capability and support systems, and development, validation and briefing of material required for SRF progress reporting.
45	DoN PGM Transition Support: Approved Transition Plan (14Jul2014): Includes direct participation by Program office in sharing studies, development and administering of training relative to spectrum transition impacts on capability, configuration management of capability and support systems, and development, validation and briefing of material required for SRF progress reporting.
47	DoN Robotics Transition Support: Includes direct participation by Program office in sharing studies, development and administering of training relative to spectrum transition impacts on capability, configuration management of capability and support systems, and development, validation and briefing of material required for SRF progress reporting.
46	DON-25 (DON Robotics); Current Expend End (months) = 52; Revised Expend End (months) = 92; Justification: A delay with initiation of contract actions resulted in a need for additional time requirements for deployment and fielding. Approved 9-Apr-2018.
48	DoN Telemetry 1: OMB Approval of the DOD's submission on 27 July 2017, Transition Plan added \$19.828M, for a revised total of \$50.6852M. On 09 Jan 18, as requested by NTIA restored Pre-Auction funds from 0.0747 to its original 0.0880.
49	DoN Telemetry 1-5: Was used on Navy Transition Plan for programmatic reasons and may be used at multiple locations in accordance with their assignments to cover specific systems not initially listed on the "Funds" Tab on the ST2 Tool.

Releasable

DOD\N 1755-1780 (Rev. 7) (Sufficient) - Notes

Note Name	Note Text
50	DoN Telemetry 4: OMB approval of 30 Nov 2017, re-aligned funds between the USAF and DON. Specifically, decrease USAF Telemetry Two (AF-09) TP by \$1.685M, decrease USAF Telemetry Three (AF-10) TP by \$1.684M, increase DoN Telemetry Four (DoN-20) TP by \$3.372M, and removes all USAF Integrated Frequency Deconfliction System (IFDS) responsibilities; assign all IFDS responsibilities to DoN.
51	DoN Telemetry 5: OMB Approval of 27 July 2017, Transition Plan added \$10.752M, for a revised total of \$12.037M. 09 April 2018 approval to extend end of expenditures to 55 months. DON CIO memo of 24 March 2020, provides official notification to extend funds execution for the AWS-3 Transition Plan in support of the Missile Defense Agency (DON-21: MDA/DON Telemetry 5) through the end of December 2020, to ensure program completion and regain of full operational capability. The efforts which will be completed by the end of calendar year 2020 include test and evaluation; procurement of radio modules, antennas and other subsystems; and integration to support the MDA programs
52	DoN TRR 1: Note 1: Approved Transition Plan of 14 July 2014 discussed: Upgrades legacy ship radios to current year technology (C-model) radios, including antennas, ship integration issues, etc.
53	DoN TRR 3: Includes direct participation by Program office in sharing studies, development and administering of training relative to spectrum transition impacts on capability, configuration management of capability and support systems, and development, validation and briefing of material required for SRF progress reporting.
54	DoN TT&C SatOps: a)Pre Auction cost are for man-hours and costs incurred associated with research, engineering studies, analyses, travel, meetings and discussions and filing presentations and reports in connection with the sharing or relocations plan. BPTF is industrial funded and therefore has no budget for this task. b) Deployment related costs are to cover time costs incurred for managing and supporting the sharing plan with AWS for 10 years.
55	DON UAS 1-4: Navy disseminated funds for each UAS for programmatic reasons, but all the systems may be used at the locations and in accordance with their assignments, therefore this umbrella entry (DON UAS 1-4) was made for tracking the transition of the spectrum within the Frequency Tab.
56	DON UAS Transition Support: Includes direct participation by Program office in sharing studies, development and administering of training relative to spectrum transition impacts on capability, configuration management of capability and support systems, and development, validation and briefing of material required for SRF progress reporting.

Releasable

DOD\N 1755-1780 (Rev. 7) (Sufficient) - Notes

Note Name	Note Text
57	FQM-151A: Navy disseminated funds for each UAS for programmatic reasons, but all the systems may be used at the locations and in accordance with their assignments, therefore the name FQM-151A was created for tracking the transition of the spectrum within the Frequency Tab.
58	L-3VNTXL-1A: Navy disseminated funds for each UAS for programmatic reasons, but all the systems may be used at the locations and in accordance with their assignments, therefore the name L-3VNTXL-1A was created for tracking the transition of the spectrum within the Frequency Tab.
59	DON UAS 2: OMB Approval on 14 Nov 2019, to change end of expenditures timeline from 53 months (01/2020) to 85 months (09/2022)
60	DON UAS 3: OMB Approval on 14 Nov 2019, to change end of expenditures timeline from 41 months (1/2019) to 120 months (8/2025).
61	Rev 6: Serial Numbers N 088211 - N 088218 changed from vacate to indefinite sharing (12 mos). These are Experimental Station Class and operate on a Non-Interference Basis. DON does not intend to vacate these assignments and will continue to operate NIB coordinated with Licensees.
